Cindy,

## Nonresponsive

Are you doing the DIMOCK call Tuesday? I will call in also.

Spoke with Robin on the Dimock rad data. Cleared up the confusion and called SERAS. They have everything we have. Just missing the Th and Gamma EDDs of the hardcopies we got last week.

## Nonresponsive

We had some confusion about the rad and isotech data packages that came in. No one seemed to know what to do with them. Ed eventually had them scanned and uploaded them to J:. Then we talked with Robin and Stevie about what the process was from there. Ed is writing a cover letter for the isotech sample, and Robin and/or Stevie will upload to the ftp site. We did this because HSCD management was asking about the status of the data. Need to make sure your folks know what to do when you are out.

# Nonresponsive

I delegated the Thursday Dimock call to you.
